

Criterion provides full life-cycle services for our clients in the financial services, energy, telecommunications, government, and life sciences market sectors.

Criterion Systems has relationships with leading technology solutions companies in the world such as Microsoft, Oracle, Fast, IBM Siemans, Teradata, and others.

Criterion has a strong history of delivering some of the most innovative and cost effective process and technology solutions in the marketplace today.

CORE SERVICES

Custom Development—Criterion has an exclusive RetrievalWare source code development agreement to provide custom development and integration capabilities for the entire product line including semantic network development, linguistic support, query operator extensions and optimization, or other advanced analytical functions. All development is highly secured to meet sensitive security requirements with controlled distribution directly to agencies.

RetrievalWare Support Services—Criterion's dedicated cleared staff of RetrievalWare engineers provide a full spectrum of product support options to address sensitive security implementations.

Systems Integration—Criterion is the leading supplier of RetrievalWare integration services providing a complete life-cycle support capability including design, development, and implementation services. We provide full system integration and post-development support and management including on-site support and remote hosted services. As a full service partner, Criterion manages business requirements analysis, requirements definition, development and maintenance of enterprise applications, hardware acquisition, software staging, and system installation. By employing real-time systems architecture and engineering skills, coupled with our extensive in-depth knowledge of RetrievalWare, Criterion delivers Search Architecture and Technology Integration services with the efficiency and effectiveness required to keep pace with today is rapid rate of change.

Installation and Configuration—Criterion provides cleared staff for full product installation and configuration services including data and content preparation services, data cleansing, security and authentication implementation, system tuning, and benchmarking services.

Migration to FAST—As a strategic FAST development partner, Criterion engineers are trained in both RetrievalWare and FAST products. In cooperation with FAST engineering, Criterion has developed comprehensive migration strategies to take advantage of the latest product offerings from FAST, while maximizing your investment in RetrievalWare software.

Search Technology and Integration—Most search applications require the integration of multiple technologies to meet functional solution requirements and to maximize user expectations. Criterion has extensive experience in advanced search systems integration services that combine search, database, data warehouse, text and media analytics, advanced storage architecture, collaboration tools, GPS, and many other capabilities into next generation information architectural solutions.

OUR COMMITMENT

Criterion Systems is steadfast in our commitment to on-time and on-budget delivery of high quality and effective technology solutions, consulting services, and project management designed to meet the specific needs of our clients.

CRITERION SYSTEMS, INC.

Headquartered in Northern Virginia's technology corridor, Criterion Systems, Inc. specializes in providing strategic, business process, and information technology services to our commercial and government customers. Criterion is managed by a nationally recognized group of senior executives with extensive industry experience, delivering exceptional solutions and value to our customers.
